ASUS ZenWiFi BD4 User Manual

FCC id: [MSQ-RTBE7M00](#)

# ASUS

## IN SEARCH OF INCREDIBLE

### Hardware Explanations

1. Plug the adapter into the DC port, and press the power switch.
2. The power LED will light up when your hardware is ready.

### ZenWiFi BD4 Overview

### 2.5GbE port (WAN/LAN auto-detecting)

- Connect your optical modem to a 2.5GbE port with a network cable.
- Connect your PC to a 2.5GbE port with a network cable.

### Specifications:

#### DC Power Adapter

DC Output: +12V with max 1.5A current

#### Operating Temperature

0~40°C

Storage 0~70°C

#### Operating Humidity

50~90%

Storage 20~90%

# Before Setup

## Preparing to set up an AiMesh WiFi system

1. Find two ZenWiFi BD4, and power both on.
2. Use a network cable to connect your optical modem to a 2.5GbE port of ZenWiFi BD4 with the "Main Unit" sticker. This ZenWiFi BD4 will be the AiMesh router, and the other ZenWiFi BD4 will be the AiMesh node.
3. The LED turns solid blue to indicate that ZenWiFi BD4 is ready for setup.

## ASUS Router App

Download free ASUS Router APP to set up and manage your router(s).

## AiMesh Setup Steps

### Prepare

Place your AiMesh router and node in the same room and at least 1 meter apart during the setup process.

### AiMesh node

Keep your AiMesh node powered on and standby for AiMesh system settings.

## Launching ASUS Router APP

Launch ASUS Router APP, and then follow the on-screen instructions to finish the AiMesh setup.

**NOTE:** When you're using a wireless backhaul to connect your router and AiMesh node, both 2.5GbE ports on your AiMesh node can be used as LAN ports.

## Troubleshooting

If your AiMesh router cannot find any AiMesh node nearby or synchronization fails, please check the following and try again.

- Move your AiMesh node closer to the AiMesh router ideally. Ensure that it is within 3 meters.
- Your AiMesh node is powered on.

## Relocation

### THE BEST PERFORMANCE

Locate the AiMesh router and node at the best place.

**NOTES:** To minimize interference, keep the routers away from devices like cordless phones, Bluetooth devices and microwave ovens. We recommend that you place the routers in an open or spacious location.

## ZenWiFi BD4 LED indications

### Solid blue:

Your ZenWiFi BD4 is ready for setup.

### Solid white:

Your ZenWiFi BD4 is online and works well.

### Solid yellow:

The signal between your ZenWiFi BD4 router and the node is weak.

**Solid red:**

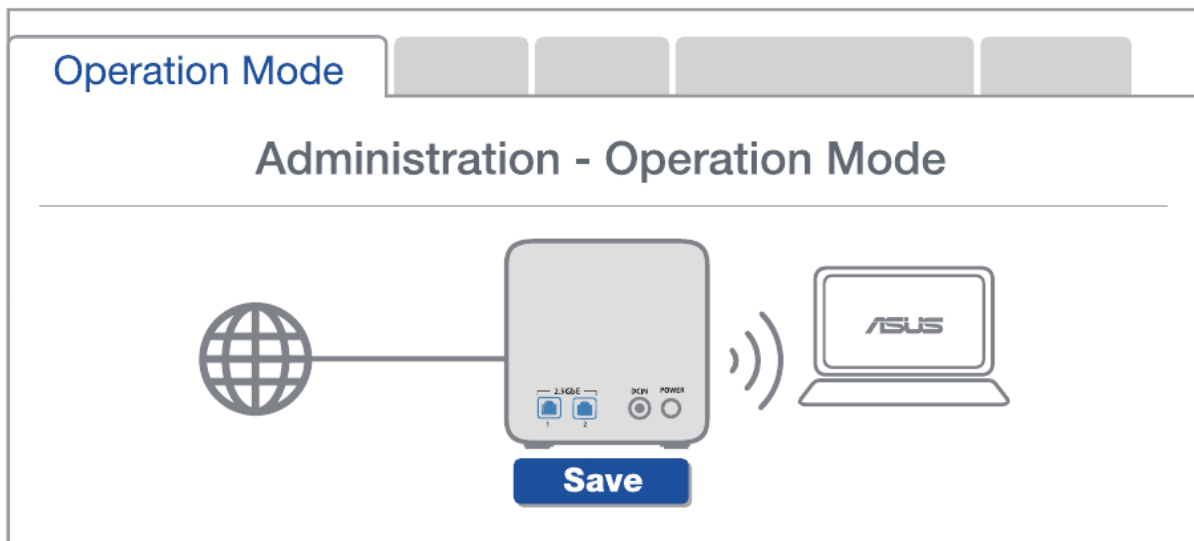

Your ZenWiFi BD4 router has no Internet connection. / Your node is disconnected from the router.

## FAQ

### FREQUENTLY ASKED QUESTIONS

**Q1: Does the AiMesh router support Access Point mode?**

A: Yes. You can choose to set the AiMesh router as router mode or access point mode. Please go to web GUI (<http://www.asusrouter.com>), and go to the page Administration > Operation Mode.

**Q2: Could I setup wired connection between AiMesh routers (Ethernet backhaul)?**

A: Yes. AiMesh system supports both wireless and wired connection between AiMesh router and node to maximize throughput and stability. AiMesh analyzes the wireless signal strength for each frequency band available, and then determines automatically whether a wireless or wired connection is best to serve as the inter- router connection backbone.

1. Follow the setup steps to establish a connection between the AiMesh router and node via WiFi first.

2. Place the node in the ideal locations for best coverage. Run an Ethernet cable from either 2.5GbE port of the AiMesh router to either 2.5GbE port of AiMesh node.

3. AiMesh system will auto-select the best path for data transmission, whether wired or wireless.

**Q3: Where can | find more information about Mesh WiFi system?**

A: Technical support site: <https://www.asus.com/support>
