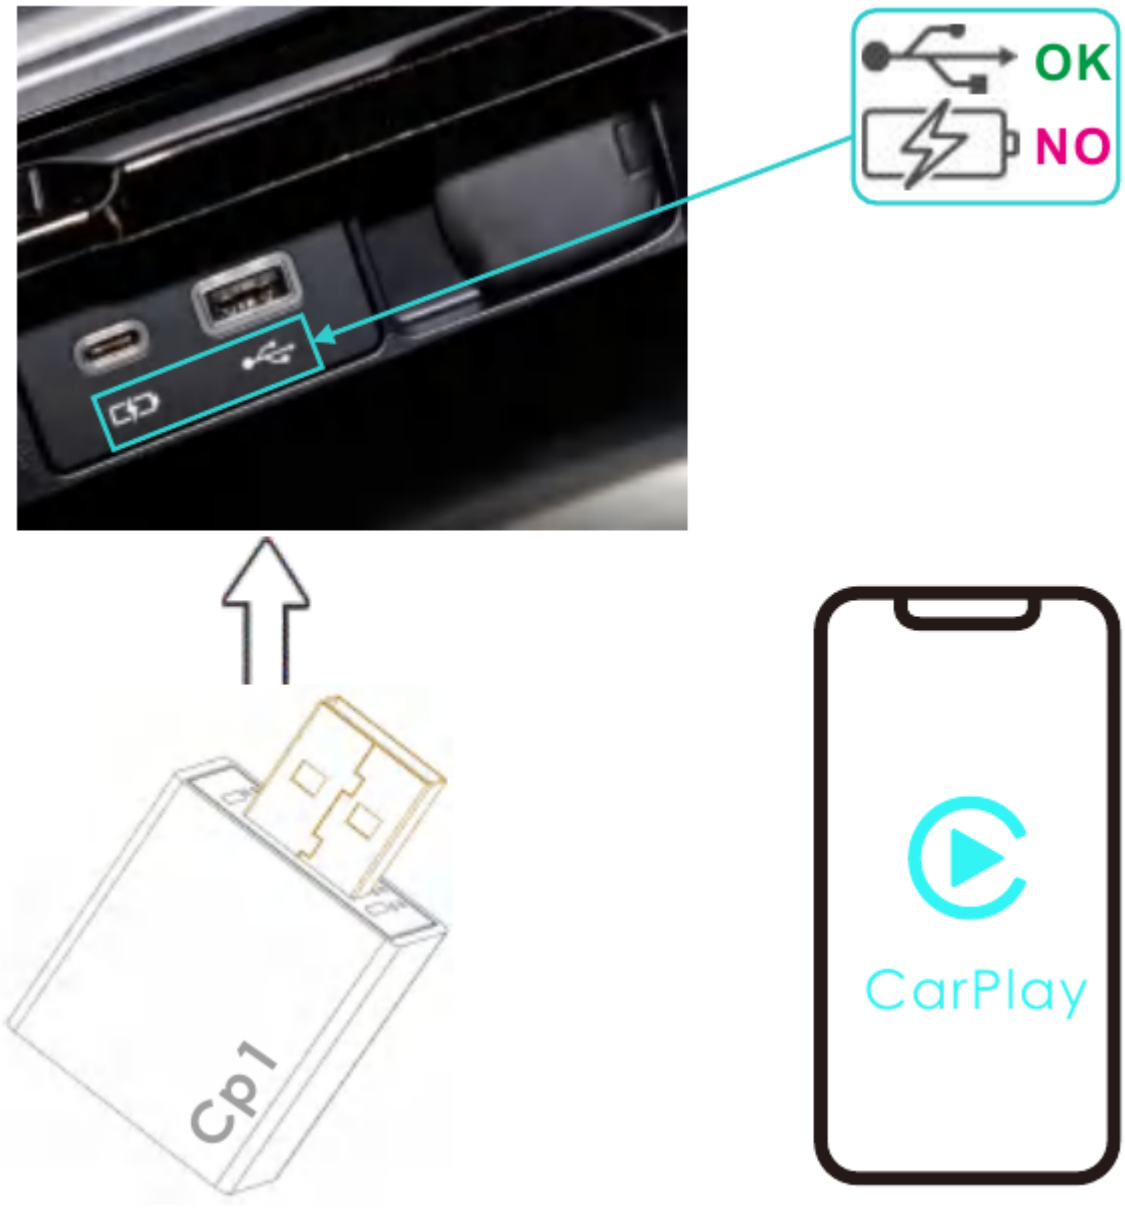
Connection diagram



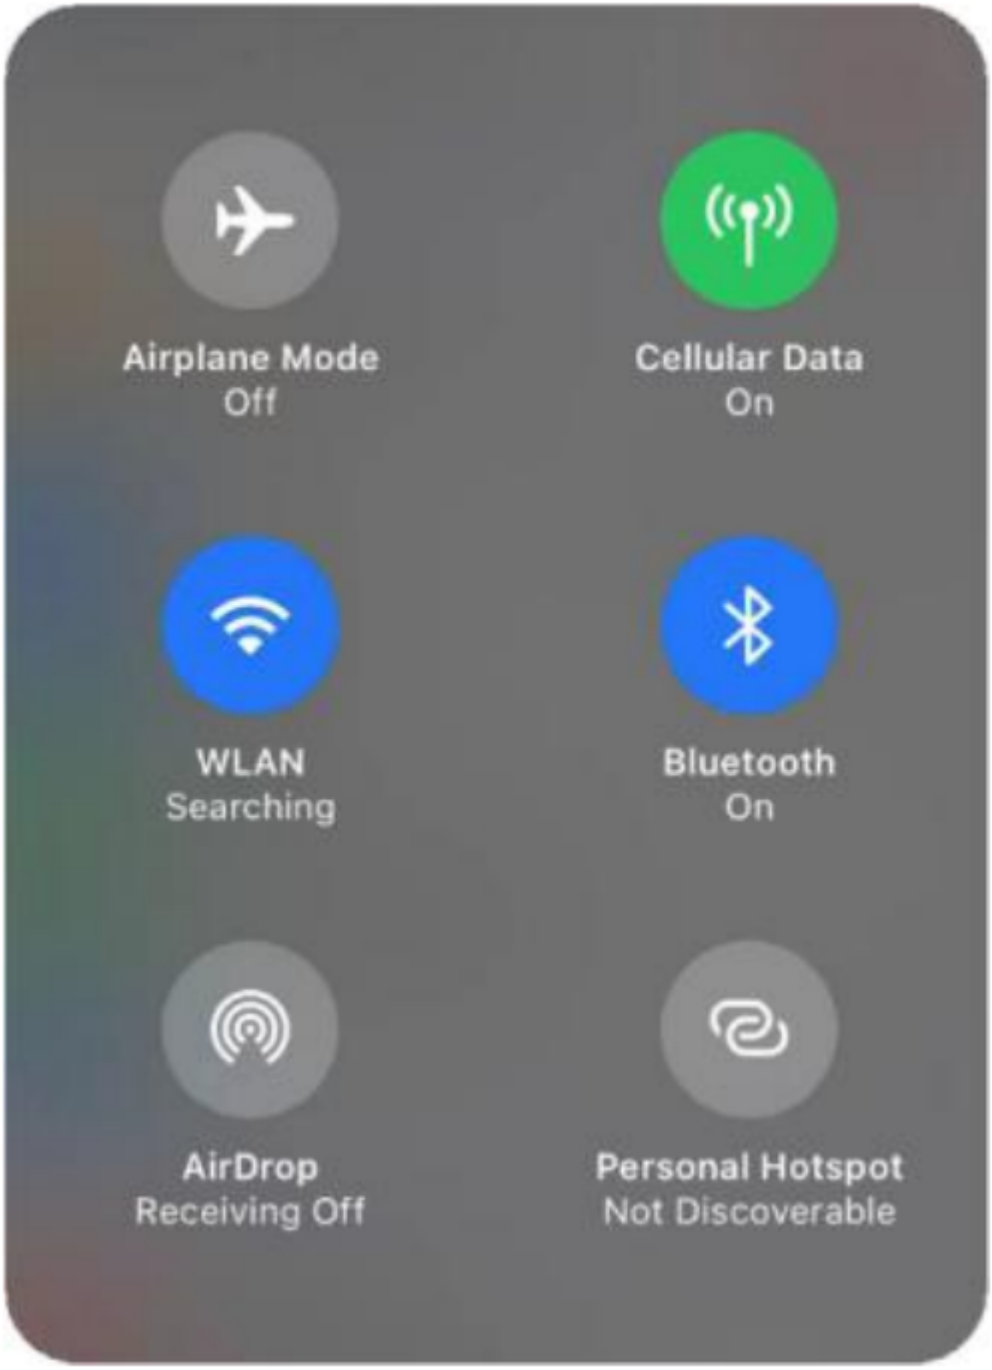
NOTE!

The CarPlay Kits should be plugged into the USB port that is for wired Apple CarPlay connecting if there are multi USB ports in your car.

How to set up wireless CarPlay

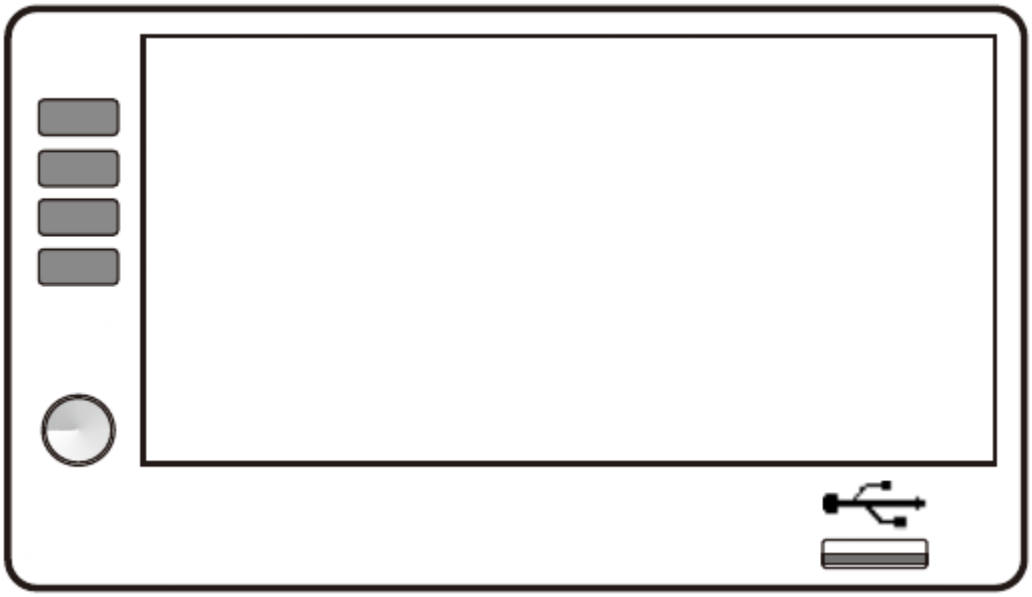
1: Start the car and wait for the car engine system to load. Keep your phone’s Bluetooth and Wi-Fi enabled and not connected to any other signals.

Manualsum



2: Connect the Wireless CarPlay Kits to your vehicle’s Type-A port with Apple CarPlay functionality. Note that if your car has more than one port, make sure to plug the Wireless CarPlay Kits into the Type-A port of the wired CarPlay.

Manualsum



With a diagram of the data transfer ports, some of the ports will be wrapped in a white wire frame.

3: Open the Bluetooth interface of the mobile phone, find the Bluetooth signal of the Wireless CarPlay Kits “Cp 1-****” Click pairing, the phone will prompt “Bluetooth pairing request”, click all prompts “allow”, wait a few seconds to connect successfully. [Most will automatically access whether the phone matches, no need to manually click.]

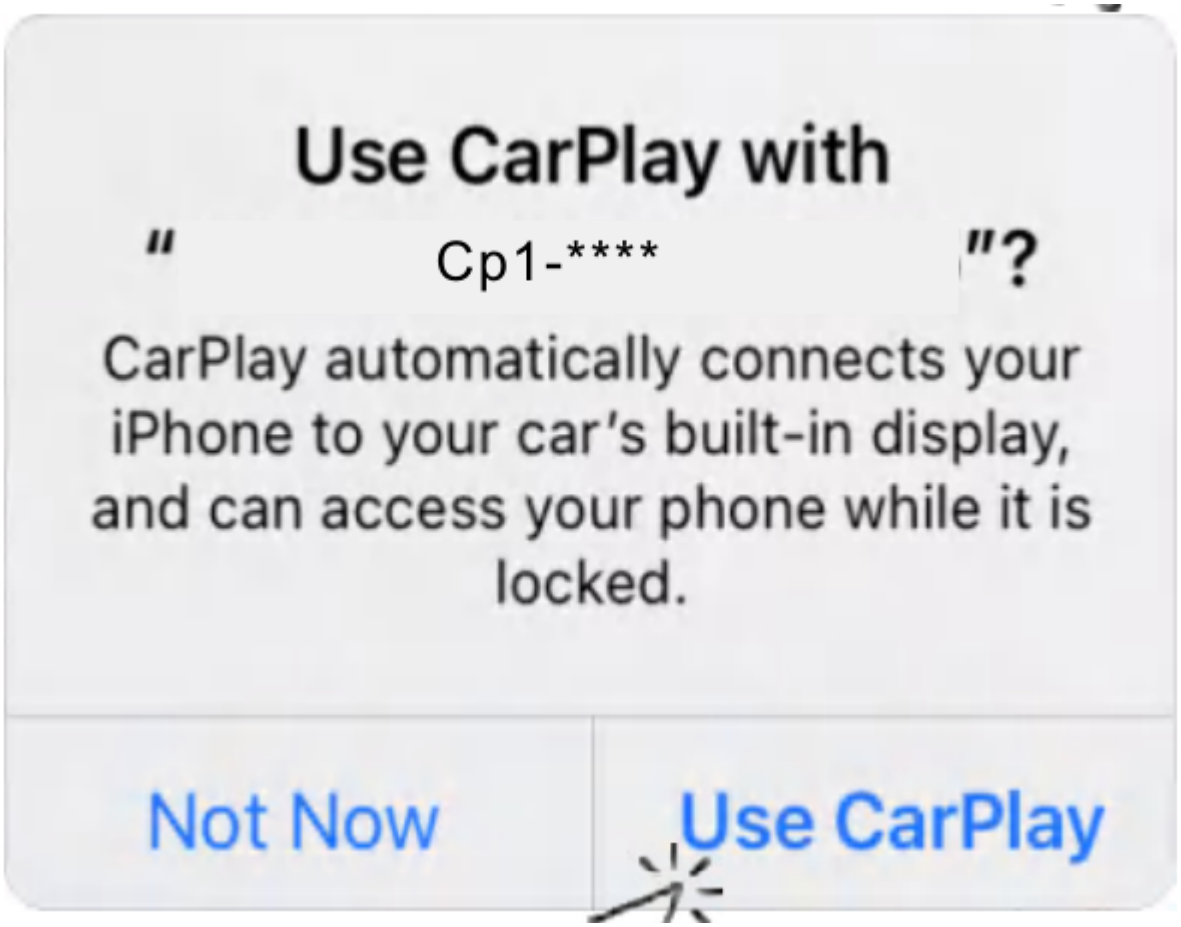
Allow Contacts and Favorites Sync?
Your car may request your contacts, phone favorites, and recent phone calls over Bluetooth. Do you wish to allow this? CarPlay will work without syncing.
Don't Allow
Allow



Use CarPlay with
" Cp1-**** "?
CarPlay automatically connects your iPhone to your car's built-in display, and can access your phone while it is locked.
Not Now
Use CarPlay
