# INSTALLATION INSTRUCTIONS

## INSTALLATION OVERVIEW

Turn off power at the source.

Make a hole in the ceiling with template in package

Carefully remove the knock-out with a screw driver or punch.

4

Open the connectors box cover. Feed supply wire into knockout hole using connector and make all connections inside the junction box using the EZ connectors (see picture below). Connect the 120V line wire to the black wire. Connect the neutral wire to the white wire. Connect bare copper wire to grounding terminal of the outlet box. Put on junction box cover.

5. Raise clips to Vertical Position and insert light into the hole until light fix properly above ceiling.

6. See user manual to set up those lights

**Note:** This product is a smart light, using Direct Digital Controls rather than triac dimming. Here is two dimming way for you reference:

1. Download Cloudy Bay's APP, go to product group or single product page, adjust the brightness and CCT of white light or color light on control panel; you can also go to home page, click product group or single product's common function, adjust brightness and color temperature
2. Control with smart voice device such as Google Assistant or Amazon Alexa if you have installed it successfully.

If you only have a dimmer at hand, set it to highest level only. If light performance is not good, we strongly advise you to change it to a regular switch.
