Words from The Product Designer

Hey friends,

Mason here, the brain behind the Original Neck Reading Light you've come to love. I'm thrilled to introduce our latest innovation — the Space Capsule Smart Starry Lamp. We've taken our passion for creating extraordinary lighting solutions and crafted something truly out of this world.

What's so special about this new product? Let me break it down for you:

Spectacular Starry Nights: With advanced LED technology and high-precision optical mirrors, this lamp transforms your room into a breathtaking star-filled night sky, creating a serene and peaceful atmosphere.Manualsum

Smart Customization: Equipped with a smart chip and Bluetooth, you can control the lamp remotely via a dedicated app. Switch between various music modes, adjust nebula colors, brightness, rotation speed, and star effects to suit different moods and needs. Perfect for relaxation, meditation, or setting the scene for sleep.

This isn't just a lamp; it's your gateway to a cosmic experience, making every moment magical. Ready to transform your space into a starry haven? Get your Space Capsule Smart Starry Lamp and let's bring the universe indoors.

Happy stargazing,

Mason

Founder & CEO of Glocusent

Product Features

Various Modes	• **Concert Mode:** Integrates lighting effects into music performances to create a dreamlike ambiance, providing a dual sensory experience of sight and sound. • **Lighting Mode:** Displays pure lighting effects by combining nebula light, starry light, and night lights for an unparalleled immersive starry visual feast. • **Music Mode:** Enjoy pure music performances without visual distractions. The gentle flow of melodious tunes helps you immerse in the sentimental atmosphere created by the music, relieving stress and achieving deep relaxation.
Multiple Light Effects	• **Projection Area:** With advanced optical design, the projection covers the entire bedroom, delivering an immersive starlight experience like never before. • **16 Colors:** The nebula light offers 16 colors, perfect for various scene settings. • **Breathing Frequency:** Mimics biological sensing, with nebula projections that sync with your breathing rhythm. • **Light Effects & Speed:** Adjustable nebula flow speed and control over the starlight effects.
Pre-installed Songs	• TF Card with 60 pre-installed free songs. • Supports switching between 3 music genres.
Custom Schedule	• Custom schedules help you effectively manage time and reduce anxiety.

- Long-term habit-building plans assist in establishing a regular lifestyle, enhancing physical and mental health.

Custom Combination
- Create your own exclusive light and music show by combining various lights, effects, and songs.

Convenient Control
- Operate the device seamlessly via the app.
- Supports voice interaction with Alexa and Google Home.
- App comes with a built-in sleep duration calculator.

Time Display Screen
- Real-time digital clock display for easy time checking.
- Icons indicate ongoing scheduled activities.

Night Light Companion
- Independently controlled night light with adjustable brightness.

Installing Your Device

Device Power On:

1. Please plug in this device using a 12VDC 2A power supply and press the power button to turn it on.
2. The device will play a prompt: "Please open the app on your smartphone and complete the device setup". If the device is not connected to the network, you can play songs from the TF card.

Pairing Your Device with the Glo Sleep App

What You Need:

- A WiFi router supporting the 2.4GHz and 802.11b/g/n bands.

5GHz is not supported.

- Ensure that the device's WiFi setting in the Glo Sleep App matches your smartphone's network.

1. Download the Glo Sleep App from the App Store (iOS) or Google Play (Android).
2. Turn on the Bluetooth on your smartphone.
3. Open the app, complete account registration, tap the "+" icon in the top right corner, and search for "Starry Sky Lamp N12."
4. Tap the device icon and follow the on-screen instructions to complete pairing.

Glo Sleep App

Safety Instructions

Please read and follow the safety instructions below:

- The lamp is not waterproof. Keep it away from splashes or drops of water.
- Use the lamp in temperatures between -20°C to 60°C (-4°F to 140°F).

- Do not install the lamp near heat sources.
- Keep the lamp away from potential hazards (e.g., candles, liquid-filled objects)
- The lamp's internal light source is irreplaceable. If it breaks, replace the entire lamp.
- Use only a 12VDC 2A power adapter with this device.
- Avoid placing the lamp in high places where it could fall and get damaged.
- The lamp does not contain a built-in lithium battery.

Product Specifications

User Manual	x1

FAQ

1. Cannot connect the device to Glo Sleep App.

- **a.** Ensure the device is powered on.
- **b.** Check if Bluetooth is enabled on your smartphone or try connecting with another smartphone.
- **c.** When connecting for the first time, ensure your smartphone is close to the device.
- **d.** If you are still experiencing connection issues, delete the device from the "Set" – "Device Management" page in the app. Then, reconnect using the Govee Home App, following the previously provided instructions.

2. The device lost connection.

- **a.** Ensure the device is powered on.
- **b.** Shorten the distance between the device and the router to less than 50 inches, then reconnect.
- **c.** If you are still experiencing connection issues, delete the device from the "Set" – "Device Management" page in the app. Then, Manualsum

reconnect using the Govee Home App, following the previously provided instructions.

3. Cannot pair or connect with Alexa or Google Assistant.

- **a.** Ensure the WiFi connection is stable.
- **b.** If you are still experiencing connection issues, delete the device from the "Set" – "Device Management" page in the app. Then, reconnect using the Govee Home App, following the previously provided instructions.

4. If you are unable to receive the email verification code:

- **a.** Check your spam folder, as it may have been incorrectly marked as spam. If you still do not receive the code after multiple attempts, email us at service@glocusent.com with your device ID for assistance.
- **b.** If you are registering for an account, try using a different email address.

5. How to enable Bluetooth on your smartphone:

- **a.** Open your smartphone's settings, locate the Bluetooth option, and toggle the switch to turn it on.

6. Can multiple users control the same device?

- **a.** Each device can only be controlled by one account.
- **b.** If multiple users want to control the same device, they must use the same account.

7. How to unbind your device?

- **Step 1:** Open the Glo Sleep App, go to the "Settings" page, click on the "Device Management" menu, and enter the device management list.
- **Step 2:** In the list, select and click on the name of the device you want to unbind. Enter the settings page of that device, click the "Delete Device" button at the bottom of the page to unbind the device.

8. To switch your device to a new WiFi network

- **Step 1:** Press and hold the Bluetooth button on the bottom of the device for 4 seconds to enter WiFi reconfiguration mode. Once you hear the device prompt, complete the steps in the app.
- **Step 2:** In the Glo Sleep App, go to "Set" – "Device Management" page. Select the device you want to switch WiFi networks for, then tap "WiFi Settings". Follow the provided instructions to reconnect the device.

9. To control your starry light via Alexa:

- **Step 1:** Add your Alexa speaker through the Alexa app.
- **Step 2:** In the Alexa app, go to "More" and select "Skills & Games". Search for and enable the Glocusent Starry Light skill.   Manualsum

- **Step 3:** When successful, log into your Glo Sleep app account and authorize Alexa to connect with your starry light.
- **Step 4:** Use your Alexa speaker with a custom wake word followed by "open starry light". You can then use the following phrases to control your starry light:

Example: Device (Starry)

make starry rotation one

make starry breathing ten seconds

make starry volume ten percent

10. To control your starry light via Google Home:

- **Step 1:** Add your Google speaker through the Google Home app.
- **Step 2:** Open the settings and search for "Glocusent Starry Light" under "Compatible with Google" services to enable the skill.
- **Step 3:** When successful, log into your Glo Sleep app account and authorize Google Home to connect with your starry light.
- **Step 4:** Use the following phrases to control your starry light:

Example: Device (Starry)

Change starry play next

Change starry color to red

Change starry mode to music
