### **Operating mode**

- **2.5.** The software has four working modes, including relay mode, bridge mode, AP mode, Routing mode (PPPoE dial-up, static IP, dynamic IP).
- 2.6. Bridge mode settings: Find and set in the advanced mode.
- 2.7. AP mode settings:Enter the software management page, click on the AP mode, in order to facilitate management, thisThe IP address and default gateway entered here should be the IP segment of the superior router, and the IP address cannot be the same as the superiorThe router's IP conflicts. After setting, the device's WAN port can access the external network through the settingIP address to access the management device.
- 1. **Note:** Access to external network in AP mode, other mobile devices access the AP's wirelessly obtained IP addressThe network segment is allocated by the superior device.@According to the default setting, it is not necessary to set the device-specific intranet IP address;In this case, you must manually set the IP address of the local network card connected to the computer.
- **2.8.** In AP mode, you can set 2.4G / 5.8G wireless SSID name and password. After setting, setThe prepared WAN port is connected to the external network; other mobile devices connect the SSID name of the device through wireless, enterConnect to the Internet with a password.

FAQ

#### Q : What' s the role of WiFi extender?

A : Boosts the range of your existing WiFi and creates stronger signal in hard-to-reach areas.Please note that it can't increase your wifi speed of your router, the speed of the extending wifi will be reduced.

#### Q : Where shall I place the WiFi extender?

A : We would suggest that after setting up successfully, please move this wifi extender on the halfway between your router and your weak signal area. The location that you choose must be within the range of your existing WiFi router network.

#### **Q** : How to reset the WiFi extender?

A : Press the WPS/Reset button of your extender for 10 seconds, wait to restore factory settings, when the lamp will go out and then light up again, you can begin to set up it again.

#### Q: Why does WiFi keep disconnecting?

A: We recommend resetting the WiFi extender.
