COMFAST 1300Mbps USB WiFi Adapter User Manual

2BDUR-2505014

Realtek Driver

MO0401072 Version: V1.0

Hardware installation

There are two ways to install the network card;

Note: The picture is a simplified schematic diagram, please refer to the actual product for details.

(1) Insert the network card directly into the USB port of the computementation

(2) Connect the computer USB port through the USB extension cord base (USB extension base needs to be purchased separately);

Note: When using a desktop computer, it is recommended to use a USB extension cord base to connect to the port on the back of the computer case (some desktop ports have insufficient power supply or cannot be used), and extend it to the Desktop computer usb ports.

Driver Installation

• **2-1** Open the driver folder, double-click the driver Setup installation file, the default options are completed next;

Driver download: enter "<u>http://www.szcomfast.com</u>" Click on the navigation bar Search for the corresponding model in the "Download Help" search bar, for example: "CF-924AC" and "Click to download".

• 2-3 After the installation is completed, it is recommended to restart the computer. If there is work in progress or files being written, you can restart it later. If there is nothing else, it is recommended to restart immediately;

Manualsum

• **2-4** After restarting, the driver installation is complete, you can move the mouse to My Computer, right-click and select Manage to enter the management interface to view the driver status;

L	
Thi	Open
	Pin to Quick access
	Manage
	Unpin from Start
	Map network drive
	Disconnect network drive
	Create shortcut
	Delete
	Rename
	Properties

• **2-5** After entering the management page, click Device Manager, Network Adapter in turn, you can see the installed network card driver (Note: This step requires the network card to be connected to the computer to see it.)

• **2-6** Double-click to view the device details. If there is no abnormality, the driver is running normally as shown in the figure below and the driver details can be viewed;

Network connection settings

3-1 After confirming that the driver is installed correctly, you can double-click the wireless network card icon ullin the lower right corner, and click the icon with the left mouse button. The computer will display the connectable wireless;

• **3-2** Click the wireless network you want to connect to and enter the password to connect.

Network connection status

• **4-1** After the network is connected, the computer system icon will

change to ull , and then you can right-click the **ull** icon and select "Open "Network and Internet" settings" to enter the setting selection interface.
