Battery Safety and Precautions

- For better performance and longer battery life, it is recommended that you charge the battery fully before using the mobile phone for the first time.
- The optimum performance of a new battery is typically achieved after two or three complete charge cycles.

Note: Keep in mind that continuous overcharging will affect long term battery life.

- While charging, keep the mobile phone out the reach of children.
- Store the battery in a cool and dry place away from direct sunlight and water.
- Do not expose batteries to extreme temperatures (below -8°C (18°F) or above 43°C (110°F).
- Immediately stop using the battery if it produces an odor, cracks and leaks, overheats, distorts or has any other type of physical damage.
- Avoid using the charger near or around liquids. If the charger comes in contact with water or any liquids, immediately unplug it from the outlet

to reduce the risk of overheating, charger malfunction, electric shock or fire.

Warning: Please be careful with the disposal of used batteries. Do not throw away batteries with daily waste. Please follow local environmental laws and guidelines for proper waste disposal.

Cleaning and Maintenance

- Avoid using the handset and accessories in excessively moist areas to avoid malfunction.
- Use a soft, dry cloth to clean the handset, battery and charger.
- Do not use alcohol, thinner, benzene or any other solvent to clean the handset.

IMEI Information

- To check your IMEI, press *#06#.

RADIO FREQUENCY EXPOSITION

General statement on radio frequency and RF energy

Your smart device (phone) contains a transmitter and a receiver. When it is ON, it receives and transmits RF energy. When you communicate using your smart device (phone), the system handling your call controls the power level at which your smart device (phone) transmits.

Specific absorption rate (SAR)

Your smart device (phone) is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to ensure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2W/kg(10g) and the highest SAR value for this device when tested on ear was 0.865W/kg (10g).As mobile devices offer a range of functions, they can be used in other positions, such as on the body as described in this user guide.

As SAR is measured utilizing the device's highest transmitting power, the actual SAR of this device while operating is typically below than indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum power required to communicate with the network.

Important safety information regarding radio frequency (RF) exposure

To ensure compliance with RF exposure guidelines the smart device (phone) must be used with a minimum of 5 mm separation from the body. [Manualsum](#)

Not paying attention to these instructions could result in your RF exposure exceeding the relevant guideline limits. “The highest SAR value for this mobile smart device (phone) when tested for use at the body and compliance against the standard is 0.801W/kg(10g). While there may be differences between the SAR levels on various smart devices (phone) and at various positions, they all meet the relevant International guidelines and EU requirements for RF (radio-waves) exposure”.

LIMITING EXPOSURE TO RADIO FREQUENCY (RF) FIELDS

For individuals concerned about limiting their exposure to RF fields, the World Health Organization (WHO) provides the following advice:

Precautionary measures: present scientific information does not indicate the need for any special precautions for the use of mobile smart device (phone). If individuals are concerned, they might choose to limit their own or their children’s RF exposure by limiting the length of calls, or using ‘hands-free’ devices to keep mobile smart device (phone) away from the head and body.

Further information on this subject can be obtained from the WHO home page

This symbol on your smart device (phone), the battery and the accessories means that these products must be taken to collection points at the end of their life:

- Municipal waste disposal centers with specific bins for these items of equipment.
- Collection bins at points of sale.

They will then be recycled, preventing substances being disposed of in the environment, so that their components can be reused.

IN EUROPEAN UNION COUNTRIES

These collection points are accessible free of charge. All products with this sign must be brought to these collection points.

CAUTION:

RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

- Use your smart device (phone) only with the original Redbeat batteries, chargers and accessories supplied with your smart device (phone) in the box.

In all EU member states, operation of 5150-5250MHz is restricted to indoor use only
