 Short press to adjust color temperature from 3000K to 6000K (8 gears), long press to linearly adjust color temperature from 3000K to 6000K

RF Wireless

Notes

During use, if the switch can function normally but the remote control cannot function properly, a code matching operation needs to be performed.

If the light is disturbed by other remote controls or cannot be remotely controlled. Before executing code matching, please turn off the power before turning it on.

How to perform code matching operation: Within 5 seconds of turning on the power, press and hold the start button on the remote control for 3 seconds, and the light strip will flash 3 times, indicating that the code (remote control) matches.
